ACCELERATE YOUR CAREER

Join an innovative chemical technology innovator, and an international team with various backgrounds in a culturally diverse environment. All employees have a voice and opportunities to develop their careers.

What are your expectations?

Lab Steward

Due to the success of our rapidly growing company, we are looking for a lab steward to strengthen our Operations team.

Location:	Office based in Liverpool, UK
Contract:	Permanent, full time
Compensation:	Competitive
Start Date	ASAP

While we rely upon some strong science, we also believe that the success of a company is built through its people. Therefore, we are looking for a motivated individual who wants to join us and help us harnessing tomorrow's challenges of our industry, is that you?

About LCC:

We are a diverse and international chemical technology innovator, on a mission to accelerate discoveries through the provision of novel scaffolds and building blocks.

LCC has designed and synthesized a library of novel, diverse, 3D-rich building blocks, which are used to support an international customer base. Our scaffolds can be applied to technologies across our four main product pillars: DEL, FBLD, Linkers (for PROTACs etc.), and virtual screening with our 3Discovery™ Virtual Library.

Through an ethos of purposeful curiosity, LCC's goal is to help the development of high-quality drugs, in order to bring new drugs to market, faster, better, and easier.

Job description:

You will occupy a central role and be in touch with various departments on a daily basis. Your task will be to lead the stock lab and provide support to both the chemistry teams and also the Operations and

Sales teams. Managing our stock of products and the shipments of them as well as making sure we have enough supplies and that all waste is disposed of in the correct manner.

Job responsibilities:

- Physically manage the company's stock of currently ~2500 compounds.
- Maintain quality control of stock using techniques including NMR and LC-MS.
- Replenishment of laboratory chemicals, solvents, and consumables to the predefined cells within the laboratory and requested site areas.
- Prepare customer and other outgoing shipments ready to be collected.
- Manage incoming shipments.
- Stock check of consumables store, ordering, labelling of incoming goods, and restocking of shelves including stock rotation.
- Daily collection and disposal of:
 - Contaminated and non-contaminated sharps and glass waste.
 - Hazardous and non-hazardous solvent waste from laboratory fume cupboards.
 - Hazardous and non-hazardous samples post analysis.
- Daily cleaning of laboratory glassware and restocking of cupboards with cleaned glassware.

Profile:

- Currently in higher education e.g. University
- General IT competency (including good knowledge of Microsoft Office) and confidence to learn new software programmes.
- Excellent organisational and communication skills.
- Good time management and interpersonal skills.
- Physically capable due to lifting requirements and mobile nature of the role.
- Previous experience in a chemistry company would be a plus.
- Soft skills: A positive attitude and the willingness to adapt/learn is always a good starting point!
- Applicants must be eligible to work in the UK.

To apply for this position, please send us your CV together with a cover letter to
